HIGH QUALITY

AVAILABLE IN 500 ML & 1 LTR PACK

HERBOVITA

Herbovita is a seaweed-based plant growth stimulant for healthier crop growth and higher crop yield. It helps all agricultural and horticultural crops in expressing better crop growth & improves the quality of the produce. It contains major and minor nutrients as well as growth promoting substances like amino acids, vitamins, cytokinin, auxin and ascorbic acid.

BENEFITS

- Herbovita builds up crop immunity and enhances resistance to crop disease and abiotic stress.
- Herbovita facilitates nutrient absorption by plants and helps in managing soil fertility.
- Herbovita increases fruit set ratio by preventing flowers and fruits drop.
- Herbovita stimulates soil bacteria if drenched.

APPLICATION

- Recommended dose of Herbovita is 3-4 ml/Liter of clean water. Dosage per acre is 300-400 ml per application.
- Drenching Application: - 2-3 Litre/Acre.
Minimum 3 applications of Herbovita are recommended at vegetative growth, flowering and fruit development stage.
- Spray diluted Herbovita evenly on foliage using conventional spray equipment.
For better results, apply in early morning or evening. Avoid mid-day heat or windy conditions.
